

Rock Lake School

June News

It is hard to believe how fast a school year can go! Our year flew by but we all learned many things and had lots of fun along the way. As nothing stays the same forever, we have more changes coming for next year. Sadly, Ms. Tomyk will be going to work at Argyle School for her new role as a counsellor in addition to teacher. Mr. Sobie (who has been teaching at Prairie Blossom) will be here to teach P.E. and some Science and Ms. Khubbar will be joining us to teach middle years and high school Math, along with other courses.

Over the course of the year, our students have participated in a variety of collaborative projects. They created stop motion videos, robots, scavenger hunts, roller coasters, pinatas, a mini golf course and more. Along with integration of the regular curriculum, these collaborative projects also foster independence, imagination, creativity and most importantly cooperation- which is a difficult skill for many to children to master. Projects like these keep the students engaged and often they don't even realize how much they learn along the way as they think they are just having fun!

We look forward to new faces, experiences and many successes next school year! We would like to thank the community for their cooperation this year and we hope to continue to build a strong bond between the school and community in the future. We wish you all a warm, safe and blessed summer! See you in September!

Important Dates to Remember:

First day of school:

Grades 1-12- September 7

Kindergarten- September 13
