

April

Another month has come and gone, and we have been very busy! Grade 3s and 4s have been exploring fractions and did a great job applying their knowledge when we were making a fruit salad together. On March 14th, Middle years celebrated a Pi Day and helped their younger peers understand the 'magic' of 3.14 and what the word 'circumference' means.

In English, early years students learned how synonyms and antonyms can improve their writing and transform their stories into vivid and exciting adventures.

In Science, we studied water cycle. The students built their own models to see how it works.

In Social Studies we continued to study the age of exploration. The students also worked on their mapping skills. Younger grades explored the five senses.

- Mrs. Farnworth

Spring is here! The Middle Years and High School students have been busy working on some fun projects. The Middle Years students did a great job on their portraits for Art, and the High School students created some awesome newspapers for History. We also started a new read-aloud novel, which everyone has been enjoying listening to. I hope everyone has a well-deserved Spring Break, and a happy Easter!

-Miss Blight

In March, we began the theme of Feelings in Guidance. Students are identifying what feelings look and feel like for themselves and others. When we understand our own feelings, we can better understand other people's feelings and have empathy for them. We can then understand how our actions can make others feel as well. Being aware of our emotions can help us accept them and help us deal with them when we feel overwhelmed, promoting better mental health.

- Mrs. Greigson

Happy Spring Break
