Finally, it is spring time! We are looking forward to being able to spend some time outside in the nice weather!

Reminders

- Agendas are an important communication tool between home and school. Parents can use it to let us know about appointments, illness, and anything else that might affect your child in school. The school uses them to inform parents about what students are learning at school, behaviour, upcoming events, etc. Please check your child's agenda each day to ensure you're up to date with school news. Thank you to those parents who already do so.
- With the weather getting warmer, that means that our playground is about to turn into a giant puddle! Please send an extra pair of socks to school in case they get wet throughout the day! Rubber boots would be a good idea as well!

Important Dates

April 18th – Good Friday

April 21st & 22nd – No School

Leprechaun Traps

For Science, the Early Years used the design process to plan and build a trap to catch a leprechaun. They worked hard on their designs but the leprechaun still stole all their gold and escaped!

Pi Day TT

The Middle Years and High Schoolers celebrated Pi day with some tasty Pie and board games!

Kickin it Math

The Early Years class has been working hard to earn all of their belts in Kickin it Math. Grades 2 – 4 have almost all finished addition and are switching to subtraction. The Grade 4's and 5's are almost all done multiplication and have moved onto division. This program promotes fact fluency and helping the students learn their math facts by heart!
